

SIGNAL CONVERTER FOR TRANSFERRING DATA FROM  
COMPUTER TO APPLIANCE

ABSTRACT OF THE DISCLOSURE

- 5        A signal converter for transferring data into an appliance is provided. The signal converter includes a first end connected to a port of a computer for receiving a first signal, a second end connected to a memory device of the appliance via a cable for outputting a second signal, and a controller for converting the first signal into the second  
10      signal.
